

Chain Mesh

Fencing Solutions / Dog & Boundary

- Heavy duty
- Wire Size of 2.50mm is the generally accepted standard
- Mesh size - 50mm or 60mm depending on local requirements in each state

CHAIN WIRE OR CHAIN LINK FENCING

Whites Chain Mesh, also referred to as chain wire or chain link, is produced in a variety of mesh sizes and qualities. It is normally erected along a fence line of tubular steel posts.

Heavy duty wire and a tight flexible weave pattern makes Chain Mesh the right choice for tennis courts, industrial fencing, and for enclosing large or aggressive dogs.

Standard Galvanised coating quality.

| Code | Product Description | Height cm | Length m | Aperture mm | Wire Dia. mm |
|-------|---------------------|--------------|-------------|----------------|-----------------|
| 17303 | Chain Mesh Std Galv | 90 | 20 | 50 | 2.50 |
