

Felt Mulch Ring

Outdoor Essentials / Landscaper's Materials

- Prevents weeds without chemicals
- Ideal for gardens, lawns and pots
- Cut to shape and locks in moisture

FELT MULCH RING

Whites Felt Mulch Ring creates a natural barrier against weeds while locking in moisture and reducing watering. It is easily trimmed to fit around the base of trees and shrubs or most pots and in-ground situations.

For a decorative finish and best results, remove lawn and 1cm of soil around the base of trees or shrubs then cover with your choice of mulch: wood-chip, gravel or pebbles.
