

Interlocking Steel Tree Ring Garden Edging / Edging Panels

- Made from high-strength galvanised steel
- Unique in-built interlocking system
- Protects against line trimmers

FOR CONTEMPORARY STYLE

Whites Interlocking Steel Tree Ring is a decorative edging for trees and shrubs in lawns and gardens. The modern steel finish adds contemporary style to any garden, while the high-strength steel protects against line trimmers.

Easy to install:

- follow the installation instructions on the pack
- the unique in-built interlocking system gives a neat, flush finish
