- 30kg capacity
- Suits standard 75mm brick height

LOCK-IN BRICK BRACKET

Securely holds in mortar channel

Whites Lock-in Brick Bracket is a quick and easy way to mount hanging baskets, planter boxes, shelving and bikes. It's a great way to tidy up your backyard or shed by keeping outdoor items like pool/garden hose, ladders or gas bottles off the floor.

The bracket cleverly locks into raked mortar channels, using the weight of the hanging item to simply and effectively hold it in place. Suits standard 75mm brick height with raked channels and locks in place. It can be used indoors and outdoors.
