TOUGH AND WEATHERPROOF ENERGISER

O'Briens Solar Energiser 13/70 is fully integrated solar energizer, complete with its own battery. Ideal for use where a reliable mains power supply is not available in remote or temporary situations.

Turn it on and forget, it will continue to work for up to 3 weeks without sun. It will power up to 1.5km in small to medium fence applications.

Quick and easy to install in any location and portable enough to be moved about as required. With it's super tough, drop resistant and waterproof casing, it is designed to be left outside in all weather conditions for confidence that it will keep stock contained.

360° mounting simply slide over top of a Steel 'Y' post. For correct orientation face unit towards the equator. Fully portable with carry handle and built in battery. Output leads are supplied.
